

The World Health Organization report "Preventing chronic diseases: a vital investment"

LINKS TO REPORT MATERIALS FOR PUBLIC HEALTH PROFESSIONALS AND HEALTH CARE PROVIDERS

Full report

Preventing chronic diseases: a vital investment

Full report, currently available in English. Translations will be available in the coming months.

The report makes the case for urgent action in countries all over the world to halt and turn back the growing threat of chronic diseases, and dispels the long-held misunderstandings about heart disease, stroke, cancer and other chronic diseases.

It presents a guide to governments and stakeholders around the world for effective and feasible interventions, and provides practical suggestions for how countries can implement these interventions.

Report overview in multiple languages

Preventing chronic diseases: a vital investment - Overview

Available in Arabic, Chinese, English, French, Portuguese, Russian and Spanish.

The report overview provides a brief description of the problem, the solution, and the goal. This includes:

- the size of the problem - the high and growing burden of chronic diseases globally, and in certain countries (developed and developing);
- the widely-held misunderstandings about chronic diseases;
- the economic impact that chronic diseases have on countries;
- the programs with which countries can prevent and manage chronic diseases;
- the kind of policy framework a government can use to improve chronic disease prevention and management;

- the global goal for reducing death rates from all chronic diseases.

Information sheets

Information on chronic disease risk factors, prevention, and the economic impact of chronic diseases in countries around the world.

http://www.who.int/chp/chronic_disease_report/media/information/en/index.html

Posters

"Face to face with chronic disease" in a selection of display posters.

These posters highlight the human face of chronic disease, and challenge misunderstandings about who gets chronic diseases.

The stories of these "faces" are told in the report itself, and some stories are told in the video.
